Abstract

A report on projects implementing the Ambient Intelligence (AmI) vision

In this presentation first the AmI (Ambient Intelligence) vision which was developed by the EU ISTAG (Information Society Technologies Advisory Group) and which is an important part of the EU Framework Research Programme (FP6) will be presented and described in detail. Then the issues, technologies and R&D aspects of making it happen will be elaborated and discussed. Finally, some examples of projects implementing AmI will be discussed and analysed. From there, trends, expectations and opportunities for AmI and the impact of related applications will be developed, described and analysed.
